

# Setup

---

You will be using ESLint in the exercise.

## Needed tools

1. NPM
2. git

### 1. Installation of NPM

If you don't have NPM, please follow [this](#) installation guide.

### 2. Installation of Git

If you don't have git:

1. How?!
2. Get it from [here](#)

## Getting the exercise

Clone it:

```
git clone https://github.com/vieirajlt/Tic-Tac-Toe.git
```

## Running it

Install npm dependencies

```
npm install --yes
```

Run eslint on script.js

```
npm run lint
```

Generate ESLint HTML report (on report.html)

```
npm run report
```

Note: Keep report filters in 'All', as the others have a bug

For convinience, install the [ESLint VS Code extension](#), as errors/warnings will come up automatically.
